

Servisavor®

Series of Temporary
Power Restoration Devices

SSR

Benefits:

- **Get your customers' electricity back on in minutes, not days**
- **Eliminate hassle and liability of temporary above ground cabling**
- **Find secondary faults on YOUR time, not the cable's time**

Description:

The Servisavor® is a highly mobile unit designed to temporarily restore power to customers who have a single faulted conductor. By connecting the Servisavor® between the customers' meter socket and his meter, power can be restored without immediately locating and repairing the cable fault or running temporary above ground conductors.
